

# Wax paper picture

## The workbench

- Flowers, leaves, grass, any thing from nature
- Wax lunch wrap (supermarket)
- Scissors
- Iron
- Fragrant oil (optional)

### Step 1.

Collect flowers leaves and anything that is thin in the garden; thicker branches will not work properly so stick to small finer objects then cut the middle cut of any larger flowers and any thick stems off the leaves and discard. Place the flower petals and leaves onto one side of the wax paper. Make sure the flowers and leaves are placed onto the shinny side of the paper only.

### Step 2.

Add a few drops of fragrant oil onto the flowers and close the topside of the shinny wax paper down on top of the flowers

### Step 3.

Iron the two wax sheets together; iron both sides of the design for the best results. Cut any rough ends away then place the picture into your draws as draw liners, on top of your table or on the wall, to enjoy the beautiful fragrance the wax picture provides.
