

# Flower book cover

## The workbench

- Clear contact
- Tissue paper (multi colored pack)
- Scissors
- Exercise book
- Dimensional fabric craft paints

### Step 1.

Rip the tissue paper into small pieces, then open the roll of contact and cut to size a rectangle 2cm's larger than the book on all sides. Take the backing cover off the contact and place the sticky side up; use something heavy on all 4 corners to keep it from sticking to it's self. Overlap pieces of the tissue paper onto the sticky contact, leaving 2 cm's from the sides free from paper.

### Step 2.

Once the tissue paper has completely covered the contact, place the exercise book onto the contact and wrap the ends around the front cover of the book and stick the contact on using the 2cm sticky edge of the contact, repeat this process for the back of the book.

### Step 3.

Using the dimensional paints, paint some flowers all over the cover then allow to dry before opening the book.
