

# Rope vase

## The workbench

- Craft glue
- Glass or plastic vase
- Glue brush
- Colored rope threads
- Thin plastic butterflies or butterfly stickers
- Sequence trim multiple colors

### Step 1.

Place a good layer of glue one inch wide starting at the bottom on the outside of the vase, then glue on the sequence trim all the way around the vase.

### Step 2.

Add some more glue; try to work an inch at a time otherwise the glue will dry before your rope reaches it. Wrap the rope around the vase, when you have run out of one color add a new color at the point where the previous color ran out, then continue wrapping the new color around making sure that the rope wraps close together and with no gaps. Continue this process until you have reached the top of the vase, leaving enough room to add another layer of the sequence trim.

### Step 3.

Glue the butterflies all over the vase; especially on the joins where the different colored ropes meet in order to hide the joins.
