

Crazy face magnets

The workbench

- Different colored paper
- 2 self-laminating pouches or laminating machine
- Stickers
- Magnetic roll or magnets (craft retailers)
- Glitter
- Access to a camera
- Scissors
- Craft glue

Step 1.

Using a camera take some photographs of the children showing their funniest, scariest, and craziest faces, then after having the photos developed cut the children's funny faces out. Place the photos onto different colored paper and cut out different shapes (refer to the picture), then place the colored paper with the picture on top, onto an open laminating pouch.

Step 2.

Choose the sticker theme for the photos and stick them on around the faces then add some glitter. Close the laminating sheet being careful not to move the pictures inside and seal the top sheet to the bottom sheet or put through the laminating machine. Cut out the individual pictures; then place them inside another laminating sheet to add more strength to the picture and cut out the pictures after sealing.

Step 3.

Turn the pictures over to the back and attach the magnetic stripes or magnets with the glue; then place on the fridge.
