

# Hooky game

## The workbench

- Craft glue
- Estapol gloss or varnish
- Scissors
- 5 large hooks (check the screw part against the thickness of the backing board for a good fit)
- 1 packet pipe cleaners
- Number stickers 1-5
- Paint brush
- 1 picture hanger hook
- One thick wooden backing board (craft and hardware retailers)
- Fish decoupage paper (craft retailer)

## **Step 1.**

Twist together 2 pipe cleaners and join the ends together to form a circle (refer to the picture). Repeat this stage 5 times.

## **Step 2.**

Paint the edges and sides of the wooden backing board then cut out the individual fish pictures from the decoupage paper and glue them onto the wooden backing board; make sure no pieces of the paper fish are sticking up or loose or they may peel off later.

## **Step 3.**

Estapol gloss or varnish over the fish pictures and the sides of the wooden backing board. While the gloss is still wet sprinkle glitter over the top of the whole board. Dry. Screw in the hooks and stick on the numbers. If the hooks are too long for the wooden backing, glue a scrap piece of wood to the back of the board.

## How to play Hooky.

Throw all the pipe cleaner circles at the hooks on the board; wherever they land make a note of the number. Write the numbers down on a piece of paper under your name and when you have finished playing, get a grown up to add up all the numbers. The person with the highest number wins.
