

Hanging disco balls

The workbench

- Different sized foam balls
- Pipe cleaners
- Glitter
- Craft glue

Step 1.

Apply some glue to the foam ball, it is easier to do one side at a time so only apply the glue to half of the ball.

Step 2.

Roll the glued side into the glitter so that it sticks very thick to the ball. Apply the glue to the other side of the ball, then roll that side into the glitter so that the whole ball is covered with glitter.

Step 3.

Cut a long pipe cleaner into half and push one end into the foam ball, then bend the other end over and also push into the ball so it sticks securely. Hang on the Christmas tree.
