

# Christmas window

## The workbench

- Semco peel n' stick paints (craft retailers)
- Plastic or glass board

### Step 1.

Paint the out line of the picture.

### Step 2.

Paint the picture in and add details (eyes, nose, belt) then allow 24 hours to dry. The paint should peel away easily from the board if it does not, leave for a further drying period.

### Step 3.

Place on the window, this paint is self sticking when applied to glass so no blue tack or tape is required, then when Christmas is over simply pull the picture away from the window.
