

# Christmas angel

## The workbench

- 3 gold glitter pipe cleaners
- Gold glitter
- Gold glitter pom pom
- Cone shaped foam body (craft retailers)
- Small round foam ball (head)
- 2 push in plastic eyes
- Golden plastic stars
- Yellow poster paint (non toxic)
- Paint brush
- 1 small foam star
- 1 skewer (kebab stick)
- Craft glue

### Step 1.

Paint all the foam pieces yellow then sprinkle them with a good layer of glitter, allow to dry before gluing on the gold stars. Cut the skewer stick to 6cm then push the blunt end into the top of the cone, before pushing the head onto the pointed end of the skewer along with some glue to secure the head to the body (refer to the picture). Cut off any protruding stick.

### Step 2.

Push in the eyes, glue on the pom pom nose and cut to length some red pipe cleaner for the mouth; bend the ends over and push them into the foam to secure it on. Push a pipe cleaner into the side of the cone foam at the top and bend it around and down into the bottom of the cone foam (refer to the picture). Repeat this process to complete other side.

### Step 3.

Push a 4cm length of pipe cleaner into the star foam then push the other end into the angles head (refer to the picture) and place on top of the Christmas tree.
