

# Butterfly picture

## The workbench

- A4 Self laminating sheet (supermarket or newsagents)
- Glitter
- Poster paint (non toxic)
- White paper
- Plastic stars
- 1 pom pom
- Plastic eyes
- Craft glue
- Scissors
- Colored paper (mouth)
- 1 pipe cleaner

### Step 1.

Pour the poster paint colors onto the middle of the paper then fold the paper in half and smooth the paint across the paper starting from the folded side. Open the paper up and allow the paint to dry before starting step 2.

### Step 2.

Refold the paper back into half, and cut out one side of a butterfly shape starting from the folded side. Practice with a scrap piece of paper first incase you make a mistake. Open the paper to see the butterfly. Place the butterfly inside the self-laminating sheet, and sprinkle on glitter and stars. Close the sheet and cut away the excess sheet from around the butterfly so only the butterfly shape remains.

### Step 3.

Glue on the eyes, pom pom nose and paper mouth (cut from colored paper) to the top of the butterfly. Cut a pipe cleaner into 2 pieces then bend the end over to make a circle and tape the pipe cleaners straight end onto the back of the butterfly above the eyes, refer to picture. Hang on the wall.
