

# CARTON BIRD FEEDER

Required items: Craft glue, metallic paper pieces or glitter or anything shiny like foil that will attract the birds, scissors, glue brush, milk carton, string or wire to hang it.

Step 1. Draw a circle onto the carton on two sides, making sure the holes are big enough for small birds to fly in and out easily, cut the circles out.

Step 2. This is a very easy project, add glue to one side of the carton and pour over your bag of coverings, craft glue is incredibly sticky so it won't take much for the additives to stick, gently pat on to stick firmly. Repeat this process with each side until the whole carton is covered. Wait to dry before hanging. Add some seed to the inside and wait for the birds, birds love shiny paper for the nests so don't be surprised if they pinch your paper as well.
